The following *Tables A-B* depict regional demographics and trend data extracted from 2022 *Federal Census* data, as discussed in narrative *I.A Regional Demographics and Trend Data*.

Table A. Regional Population

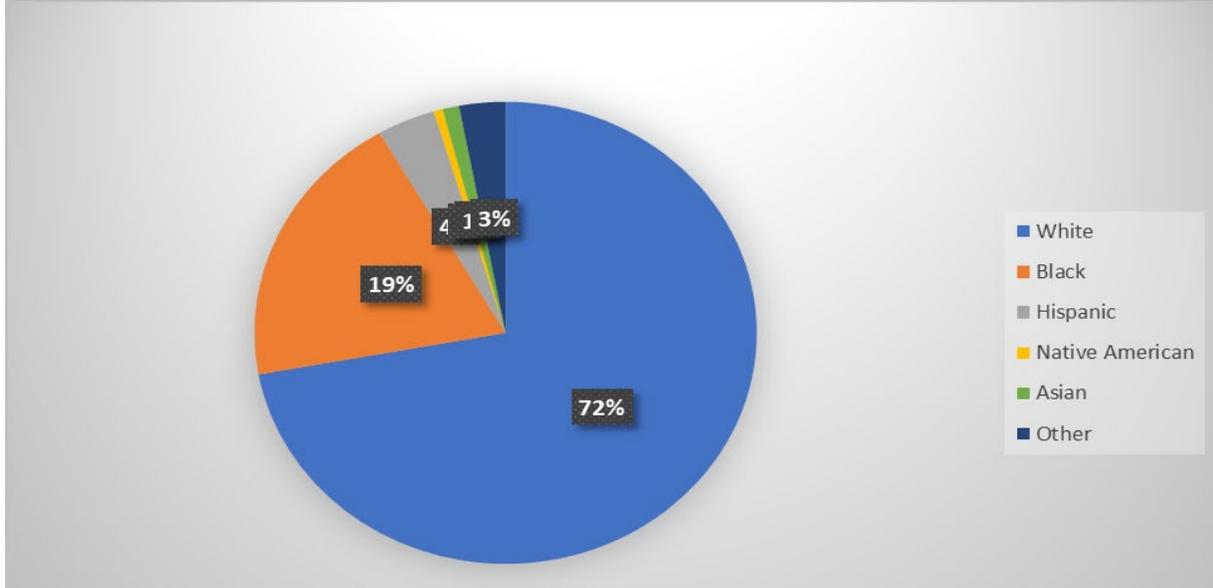

Table B. Regional Socioeconomic Characteristics

Socio-Economic Characteristics	State of Michigan	Genesee	St. Clair	Sanilac	Lapeer
Median Household Income	\$63,498	\$54,052	\$62,847	\$52,459	\$69,194
Poverty Level	13.1 %	16.3%	11.1%	14.5%	9.3%
Bachelor's Degree or higher	30.6%	22.2%	19.4%	14.9%	18.6%
Unemployment Rate	4.3%	5.4%	5.2%	5.4%	2.5%
Under 18 Years of Age	21.4%	22.3%	20.5%	21.2%	20.1%
Over 65 Years of Age	18.1%	16.8%	19.8%	22.7%	19.5%

The following *Tables C- F* depict regional 2019-22 prevention MiPHY data as discussed in narratives *I.B. The PIHP's Populations of Focus, I.D The Extent and Prevalence of SUD in the Region, and II.A The PIHP's Data Driven Prevention Goals*. Complete MiPHY data is available at the Michigan Department of Education website- <https://mdoe.state.mi.us/schoolhealthsurveys>.

Table C. Regional 2019-2022 MiPHY Data on Alcohol Use

MiPHY Data		Genesee		St. Clair		Sanilac		Lapeer	
		2019-20	2021-22	2019-20	2021-22	2019-20	2021-22	2019-20	2021-22
Percentage of students who reported sort of easy or very easy to get alcohol	Middle School	35.2%	34%	33.2%	34.5%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	60.5%	51.2%	60.6%	52.4%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
Percentage of students who reported having 5 or more drinks of alcohol once or twice each weekend to be a moderate or great risk	Middle School	64%	54%	69%	66%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	67%	65%	64%	66%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
Percentage of students who drank alcohol during the past 30 days	Middle School	2%	5%	3%	1%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	22%	13%	18%	13%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable

Table D. Regional 2019-2022 MiPHY Data on Marijuana Use

MiPHY Data		Genesee		St. Clair		Sanilac		Lapeer	
		2019-20	2021-22	2019-20	2021-22	2019-20	2021-22	2019-20	2021-22
Percentage of students who reported sort of easy or very easy to get marijuana	Middle School	20%	31%	13%	18%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	54%	55%	45%	42%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
Percentage of students who reported smoking marijuana once or twice a week to be of moderate or great risk	Middle School	50%	37%	61%	55%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	33%	28%	43%	38%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
Percentage of students who used marijuana during the past 30 days	Middle School	4%	9%	2%	3%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	23%	23%	16%	14%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable

Table E. Regional 2019-2022 MiPHY Data on Tobacco Use

MiPHY Data		Genesee		St. Clair		Sanilac		Lapeer	
		2019-20	2021-22	2019-20	2021-22	2019-20	2021-22	2019-20	2021-22
Percentage of students who reported sort of easy or very easy to get cigarettes	Middle School	25%	28%	23%	26%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	45%	41%	42%	36%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
Percentage of students who reported smoking one or more packs of cigarettes per day to be a moderate or great risk	Middle School	74%	62%	81%	80%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	82%	76%	79%	81%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable

Percentage of students who used Tobacco during the past 30 days	Middle School	1%	2%	1%	1%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	2%	1%	3%	1%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
Percentage of students who used an electronic vapor product during the past 30 days	Middle School	11%	19%	7%	8%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	27%	20%	24%	17%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable

Table F. Regional 2019-2022 MiPHY Data on Prescription Drug Abuse

MiPHY Data		Genesee		St. Clair		Sanilac		Lapeer	
		2019-20	2021-22	2019-20	2021-22	2019-20	2021-22	2019-20	2021-22
Percentage of students who reported using prescription drugs that are not prescribed to them has moderate or great risk	Middle School	68%	62%	75%	72%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	78%	71%	75%	77%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
Percentage of students who took a prescription drug not prescribed to them, including painkillers, during the past 30 days	Middle School	3%	4%	3%	4%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable
	High School	6%	5%	5%	3%	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable	MiPHY data unavailable

Table G. Women with Dependent Children at Admission

The following table depicts the number of women with dependent children upon admission to a PIHP Provider SUD Program from FY2020-2022 as discussed in narrative *I.B. The PIHP's Populations of Focus*.

Table G: Women with Dependent Children at Admission						
Dependents	Open Admissions			Percentage of Total		
	2020	2021	2022	2020	2021	2022
Yes	793	654	517	21.5%	18.5%	14.7%
No	2894	2873	3010	78.5%	81.5%	85.3%
Total Women	3687	3527	3527	100%	100%	100%

Table H. Pregnant Women at Admission

The following table depicts the number of women who were pregnant upon admission to a PIHP Provider SUD Program from FY2020-2022, as discussed in narrative *I.B. The PIHP's Populations of Focus*.

Table H: Pregnant Women at Admission						
Pregnant	Open Admissions			Percentage of Total		
	2020	2021	2022	2020	2021	2022
Yes	160	160	163	4.3%	5%	4.9%
No or N/A	3538	3367	3364	95.7%	95%	95.1%
Total	3687	3527	3527	100%	100%	100%

Table I. Age at Admission

The following table depicts the age at admission of SUD treatment consumers upon admission to a PIHP Provider SUD Program from FY2020-2022, as discussed in narrative *I.B. The PIHP's Populations of Focus*.

Table I: Age at Admission						
Age	Open Admissions			Percentage of Total		
	2020	2021	2022	2020	2021	2022
12-17	92	72	74	1%	1%	1%
18-25	763	635	601	8.5%	7.3%	6.7%
26-39	4338	4203	4125	48.7%	49%	46.1%
40-49	1803	1867	2070	20.2%	21.6%	23.1%
50-64	1793	1679	1869	20.1%	19.4%	20.9%
65+	124	156	203	1.4%	1.7%	2.2%
Total	8913	8612	8942	99.9%	100%	100%

Table J. The PIHP’s Contracted Prevention, Treatment and Recovery Providers

The following table depicts the PIHP’s established partnerships with key providers as discussed in narratives *I.C. The PIHP’s Provider Network, Services Gaps and Barriers to Treatment* and *III. The PIHP’s Prevention, Treatment, and Recovery Providers and Key Stakeholders.*

Location	The PIHP’s Contracted Prevention, Treatment, and Recovery Providers
Genesee	BioMed Behavioral Healthcare, Catholic Charities of Shiawassee and Genesee Counties, Flint Odyssey House, Genesee County Health Department, Genesee County Prevention Coalition, Genesee Health System, Great Lakes Recovery Mission, Greater Flint Health Coalition, Hope Network, Meridian Health Services, New Paths, Sacred Heart Rehabilitation Center, Serenity House Communities, Wellness AIDS Services
Lapeer	Alcohol Information and Counseling Center, Lapeer County Community Mental Health, Catholic Charities of Southeast Michigan, List Psychological Services
Sanilac	Sanilac County Counseling Services, List Psychological Services, Sanilac County Community Mental Health
St. Clair	Blue Water Recovery and Outreach Center, Catholic Charities of Southeast Michigan, Port Huron Odyssey House, IMPACT, Sacred Heart Rehabilitation Center, St. Clair County Community Mental Health

Table K. Primary Substance of Use at Admission

The following table depicts the top 3 substances of use SUD treatment consumers identified as “Primary Substance of Abuse” upon admission to a PIHP Provider SUD Program from FY2020-2022, as discussed in narrative *I.D. The Extent and Prevalence of SUD in the Region, Including Consequences of SUD.*

Table K: Primary Substance of Use at Admission						
Primary Substance of Use Identified at Admission	Open Admissions			Percentage of Total		
	<i>2020</i>	<i>2021</i>	<i>2022</i>	<i>2020</i>	<i>2021</i>	<i>2022</i>
Alcohol	<i>3154</i>	<i>3040</i>	<i>3201</i>	<i>35.3%</i>	<i>35%</i>	<i>35.8%</i>
Heroin and other opioids	<i>3452</i>	<i>3279</i>	<i>2984</i>	<i>38.7%</i>	<i>38.1%</i>	<i>33.4%</i>
Cocaine/ Crack	<i>1092</i>	<i>903</i>	<i>1153</i>	<i>12.3%</i>	<i>10.5%</i>	<i>12.9%</i>
Total of Top 3 Primary Substances of Use at Admission	<i>7698</i>	<i>7222</i>	<i>7338</i>	<i>86.4%</i>	<i>83.9%</i>	<i>82.1%</i>
<i>Total Admissions Overall</i>	<i>8913</i>	<i>8612</i>	<i>8942</i>			

Table L. Service Modality

The following table depicts the number of open admissions of SUD treatment consumers by service modality from FY2020-2022, as discussed in *I.D. The Extent and Prevalence of SUD in the Region, Including Consequences of SUD*.

Table L: Service Modality						
Service Type	Open Admissions			Percentage of Total		
	2020	2021	2022	2020	2021	2022
Long-Term Residential	31	16	5	0.4%	0.2%	.05%
Short-Term Residential	1534	1501	1696	17.1%	17.4%	19%
Detoxification	1740	1776	1680	19.6%	20.6%	18.8%
Intensive Outpatient	538	495	711	6%	5.8%	8%
Outpatient	5070	4824	4850	56.9%	56%	54%
Total	8913	8612	8942	100%	100%	99.85%

Table M. Employment Status at Admission

The following table depicts the employment status of SUD treatment consumers upon admission to a PIHP Provider SUD Program from FY2020-2022, as discussed in *I.D. The Extent and Prevalence of SUD in the Region, Including Consequences of SUD*.

Table M: Employment Status						
Employment Status	Open Admissions			Percentage of Total		
	2020	2021	2022	2020	2021	2022
Full-Time	731	813	989	8.2%	9.4%	11%
Part-Time	512	469	435	5.7%	5.4%	4.9%
Unemployed	4908	4969	4933	55.1%	57.7%	55.2%
Not in Workforce	2724	2327	2535	30.6%	27%	28.3%
N/A- Under 16	38	34	50	0.4%	0.4%	0.6%
Total	8913	8612	8942	100%	99.9%	100%

Table N. The Region’s Key Stakeholders

The following table depicts the PIHP’s established partnerships with key stakeholders as discussed in narrative *III. The PIHP’s Prevention, Treatment and Recovery Providers and Key Stakeholders*.

Location	Key Stakeholders
Genesee	Flint and Genesee Chamber of Commerce, Greater Flint Health Coalition, Genesee County Prevention Coalition, Genesee Intermediate School District, Genesee County Sherriff Department, Genesee County Department of Health and Human Services, Genesee County Drug Court, Genesee County Prosecuting Attorney, Genesee Health System, Great Start Collaborative Parent Coalition, Hurley Medical Center, multiple integrated treatment providers, multiple radio and print outlets, Michigan Department of Corrections, Families Against Narcotics, Partners 4 Recovery, Region 10 PIHP contracted prevention service providers, and Soberfest.
Lapeer	Lapeer County Community Coalition, Lapeer County Health Department, Lapeer County Intermediate School District, Lapeer County Sherriff Department, Lapeer County Department of Health and Human Services, Lapeer County Prosecuting Attorney, Lapeer County District Court, Lapeer County Circuit Court, Lapeer County Juvenile Court, Michigan Department of Corrections, Lapeer County Community Mental Health, Families Against Narcotics, multiple integrated treatment providers, multiple radio and print outlets, and Region 10 PIHP contracted prevention service providers.
Sanilac	Sanilac County Health Department, Sanilac County Intermediate School District, Sanilac County Sherriff Department, Sanilac County Department of Health and Human Services, Sanilac County Prosecuting Attorney, Sanilac County District Court, Sanilac County Circuit Court, Michigan Department of Corrections, Sanilac County Community Mental Health, multiple integrated treatment providers, multiple radio and print outlets, and Region 10 PIHP contracted prevention service providers.
St. Clair	St. Clair County Community Services Collaborating Body, St. Clair County Health Department, St. Clair County Sherriff Department, St. Clair County Intervention Center, St. Clair County Regional Educational Service Agency, St. Clair County Department of Health and Human Services, St. Clair County Prosecuting Attorney, St. Clair County District Court, St. Clair County Circuit Court, St. Clair County Juvenile Day Treatment/Night Watch, St. Clair County Community Mental Health, St. Clair County Substance Prevention through Early Action and Knowledge Coalition, multiple integrated treatment providers, multiple radio and print outlets, Michigan Department of Corrections, Families Against Narcotics, and Region 10 PIHP contracted prevention service providers.

The following *Tables O.- S.* depict the Prevention Logic Model created by the PIHP based on the epidemiologic data discussed in narrative *V. The PIHP's Prevention and Treatment Logic Models.*

Table O. Prevention Logic Model 1: Reduction of Underage Drinking

Overall Goal	Reduce Rates of Underage Drinking
Primary Problem	Elevated rates of underage drinking among youth and young adults
Intervening Variable(s)	<ol style="list-style-type: none"> 1. Lack of Education 2. Low perception of risk/harm of alcohol use by youth/young adult 3. Family communication around alcohol use 4. Retailer sales of alcohol to underage youth/young adults
Objectives	<ol style="list-style-type: none"> 1. Educate youth/young adults and families about the risk/harm of underage alcohol use 2. Educate families to communicate with youth/young adults about underage alcohol use and expectations not to use 3. Implement environmental prevention strategies to address youth/young adult access to alcohol
Activity(s)	<ol style="list-style-type: none"> 1. Contract with prevention providers to implement evidenced- based educational programming to youth/young adults and families 2. Contract with prevention providers to implement alcohol vendor education to retailers to retailers
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County
Immediate Outcome(s)	<ol style="list-style-type: none"> 1. Increase in perceived risk/harm of alcohol use by youth/young adults as evidenced by EBP programming pre/post outcomes 2. Increase in disapproval of alcohol use by youth/young adults as evidenced by EBP programming pre/post outcomes 3. Increase in family communication around underage drinking as evidenced by EBP programming pre/post-test outcomes 4. Increase in perceived risk/harm of selling alcohol to underage youth/young adults evidenced by regional MiPHY data
Long-Term Outcomes	<ol style="list-style-type: none"> 1. Increase in perceived risk/harm of alcohol use by youth/young adults as evidenced by regional MiPHY data 2. Increase in disapproval of alcohol use by youth/young adults as evidenced by regional MiPHY data 3. Decrease in past 30-day use of alcohol by youth/young adults as evidenced by regional MiPHY data

Table P. Prevention Logic Model 2: Reduction of Youth and Young Adult Marijuana Use

Overall Goal	Reduce Rates of Youth and Young Adult Marijuana Use
Primary Problem	Elevated rates of marijuana use among youth and young adults
Intervening Variable(s)	<ol style="list-style-type: none"> 1. Lack of education 2. Family communication around marijuana use
Objectives	<ol style="list-style-type: none"> 1. Educate youth/young adults and families about the risk/harm of underage marijuana use 2. Educate families to communicate with youth/young adults about marijuana use and expectations not to use 3. Implement a region wide Media Campaign aimed at reduction of youth marijuana use.
Activity	<ol style="list-style-type: none"> 1. Contract with prevention providers to implement evidenced- based educational programming to youth and young adults 2. Contract with prevention providers to implement evidenced- based educational programming to families
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County
Immediate Outcome(s)	<ol style="list-style-type: none"> 1. Increase in perceived risk/harm of marijuana use by youth/young adults as evidence by EBP programming pre/post- test outcomes 2. Increase in disapproval of marijuana use by youth/young adults as evidence by EBP programming pre/post- test outcomes 3. Increase in perceived risk/harm of marijuana use by youth/young adults as evidence by EBP programming pre/post- test outcomes 4. Increase in disapproval of marijuana use by youth/young adults as evidence by EBP programming pre/post- test outcomes
Long-Term Outcomes	<ol style="list-style-type: none"> 1. Decrease in past 30-day use of marijuana by youth and young adults as evidenced by regional MiPHY data

Table Q. Prevention Logic Model 3: Reduction of Underage Tobacco Use

Overall Goal	Reduce rates of youth access to tobacco
Primary Problem	Elevated rates of youth access to tobacco
Intervening Variable(s)	<ol style="list-style-type: none"> 1. Retail access to tobacco 2. Low perception of risk/harm of nicotine use by youth 3. Family communication around tobacco/nicotine use
Objectives	<ol style="list-style-type: none"> 1. Educate retailers about the risk/harm of youth access to tobacco 2. Educate youth about the risk/harm of tobacco use 3. Educate families to communicate about youth tobacco use 4. Implement a regionwide Media Campaign with a goal of reducing underage tobacco use
Activity	<ol style="list-style-type: none"> 1. Contract with DYTURs to provider tobacco vendor education to 50% of retailers on Master Retail List (MRL) 2. Contract with DYTURs to conduct state mandated Synar checks 3. Contract with DYTURs to conduct tobacco non-Synar compliance checks on 25% of retailers 4. Contract with prevention providers to implement evidenced- based educational programming to schools, individuals, and families
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County
Immediate Outcome(s)	<ol style="list-style-type: none"> 1. Increase in perceived risk/harm of youth access to tobacco and nicotine
Long-Term Outcomes	<ol style="list-style-type: none"> 1. Decrease in past 30-day use of tobacco/nicotine by youth under the age of 18 as evidenced by regional MiPHY data 2. The PIHP’s Synar retailer violation rate shall be less than 20%

Table R. Prevention Logic Model 4: Reduction of Opioid Prescription Drug Misuse

Overall Goal	Reduce rates of opioid prescription drug misuse
Primary Problem	Elevated rates of prescription drug abuse (medical and non-medical)
Intervening Variable(s)	<ol style="list-style-type: none"> 1. Lack of education 2. Family communication around opioid prescription drug abuse 3. Access of opioid prescription drugs
Objectives	<ol style="list-style-type: none"> 1. Educate youth, adults, older adults 55+, and families about the risk/harm of opioid prescription drug abuse 2. Educate families to communicate about opioid prescription drug misuse 3. Educate communities about local data, risk/harm of opioid prescription drug misuse, and community impact
Activity	<ol style="list-style-type: none"> 1. Contract with prevention providers to implement evidenced- based educational programming to individuals and families 2. Contract with prevention providers to disseminate media campaign 3. Contract with prevention providers to implement evidenced- based educational programming to families 4. Contract with coalitions to address opioid prescription drug abuse at the community level
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County
Immediate Outcome(s)	<ol style="list-style-type: none"> 1. Increase in perceived risk/harm of prescription opioid use evidenced by EBP programming pre/post outcomes 2. Increase in disapproval of prescription opioid use as evidenced by EBP programming pre/post outcomes 3. Increase in family communication around opioid prescription drug abuse as evidenced by EBP programming pre/post-test outcomes
Long-Term Outcomes	<ol style="list-style-type: none"> 1. Increase in perceived harm/risk of opioid prescription drug use as evidenced by regional MiPHY data 2. Increase in disapproval of opioid prescription drug use as evidenced by regional MiPHY data 3. Decrease in past 30-day use of opioid prescription drugs as evidenced by regional MiPHY data

Table S. Prevention Logic Model 5: Reduction of Older Adult (55+) Alcohol and Opioid Misuse

Overall Goal	Reduction of older adult (55+) alcohol and opioid misuse
Primary Problem	Elevated rates of alcohol and opioid use among older adults
Intervening Variable(s)	<ol style="list-style-type: none"> 1. Lack of education 2. Family communication alcohol and opioid use 3. Community Readiness
Objectives	<ol style="list-style-type: none"> 1. Educate older adults and families about factors that make older adults vulnerable to alcohol and opioid abuse and the risk/harm of alcohol and opioid abuse 2. Educate families about communicating with older adults about alcohol and opioid use 3. Educate community about local data, risk/harm and community impact of older adults and alcohol and opioid abuse
Activity	<ol style="list-style-type: none"> 1. Contract with prevention providers to implement evidenced- based educational programming to older adults 2. Contract with prevention providers to implement evidenced- based educational programming to older adults and their families
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County
Immediate Outcome(s)	<ol style="list-style-type: none"> 1. Increase in perceived risk/harm of alcohol and opioid use by older adults as evidenced by EBP programming pre/post- test outcomes 2. Increase in disapproval of alcohol and opioid use by older adults as evidenced by EBP programming pre/post- test outcomes 3. Increase in family communication around older adults and alcohol and opioid use as evidenced by EBP programming pre/post- test outcomes 4. Increase in perceived risk/harm of alcohol and opioid use by older adults as evidenced by regional community surveys
Long-Term Outcomes	<ol style="list-style-type: none"> 1. Decrease in past 30-day use of alcohol and opioids by older adults as evidenced by the regional community survey(s) 2. Decrease in past 30-day use of alcohol and opioids by older adults evidenced by regional community survey(s) 3. Decrease in past 30-day use of alcohol and opioids by older adults as evidenced by regional community survey(s)

The following *Tables T- W*. depict the Treatment Logic Model created by the PIHP, as discussed in narrative *V. The PIHP's Prevention and Treatment Logic Models*.

Table T. Treatment Logic Model 1: Increase the PIHP's MAT Provider Capacity

Overall Goal	To ensure SUD treatment providers of the PIHP have the capacity and competency to meet the continued need for MAT services.
Primary Problem	There is limited access to MAT services in the region.
Strategies	<ol style="list-style-type: none"> 1. Increase support of EBPs to treat Opioid Use Disorder (OUD) in all SUD treatment and recovery services providers 2. Increase opportunities for qualified health providers to partner with PIHP and provide integrated Opioid Health Home (OHH) services by offering an Opioid Treatment Program (OTP) or becoming an Office Based Opioid Treatment Provider (OBOT) 3. Improve access to MAT throughout the region utilizing mobile services and increasing service locations
Activities	<ol style="list-style-type: none"> 1. Expand and execute contracts with a variety of multiple providers to ensure enough capacity and methodologies are available to individuals seeking SUD Treatment services in the region. 2. Continue partnerships with current providers and to increase enrollments at current OTP OHHs 3. Create provider partnership to establish new OBOT OHHs and increase coordination of care in underserved areas of region 4. Provide community education on positive outcomes of MAT and what an OHH can offer through trainings and correspondence
Outputs	Increase the number of SUD MAT service providers at all levels of care, offering different evidenced based practice options to individuals seeking treatment
Intermediate Outcomes	Increase the number of MAT providers and qualified OHHs available in the region to accommodate the anticipated increase in demand for this treatment modality
Long term outcomes	Individuals receiving MAT services will have access to necessary treatment services when needed and continue to receive these services for as long as medically necessary to maintain long-term recovery to improve overall well-being
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County

Table U. Treatment Logic Model 2: Increase Recovery Housing Capacity in the Region

Overall Goal	Increase the availability of SUD recovery housing services within the region
Primary Problem	The availability of recovery housing services within the region is limited
Strategies	<ol style="list-style-type: none"> 1. Increase the number of recovery homes physically located within the region 2. Provide necessary resources and support for the MARR certification of recovery homes 3. Increase the resources needed for family recovery homes in the region
Activities	<ol style="list-style-type: none"> 1. Execute contracts with a variety of providers to increase capacity of recovery housing services within the region 2. Support providers through the process of opening additional recovery homes and obtaining MARR certification for their homes
Outputs	Increase in the number of recovery housing providers that offer various EBPs to individuals seeking recovery services in the region
Intermediate Outcomes	Increase in the number of MARR certified recovery homes in the region
Long term outcomes	<ol style="list-style-type: none"> 1. Increase the number of certified recovery homes within the region, particularly in Lapeer and Sanilac Counties 2. Increase in the number of family recovery homes for women and their children within the region
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County

Table V. Treatment Logic Model 3: Increase the Number of Recovery Coaches in the Region

Overall Goal	Increase availability of recovery coaching services in the region
Primary Problem	The availability of recovery coaches is limited in the region
Strategies	<ol style="list-style-type: none"> 1. Continued support of training and certification opportunities for recovery coaches in the region 2. Continued support for training and monitoring of consumer engagement in treatment and recovery services
Activities	<ol style="list-style-type: none"> 1. Execute contracts with a variety of providers to ensure enough recovery coach capacity in the region 2. Continue to fund recovery coach certification trainings in the region
Outputs	Increase the number of recovery coaching service providers at all levels of care
Intermediate Outcome(s)	An increase in individuals that have completed recovery coach training and certification in the region
Long term outcomes	A sufficient number of recovery coaches available at all levels of care in the region
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County

Table W. Treatment Logic Model 4- Increase the Treatment Services Recovery Supports for Women with SUD that have Dependent Children

Overall Goal	Increase the treatment services and recovery supports within the region for women with SUD that have dependent children
Primary Problem	A large increase in the number of women with dependent children entering treatment and recovery services in the region, along with high rates of Neonatal Abstinence Syndrome (NAS) births in the region
Strategies	<ol style="list-style-type: none"> 1. Provide education and support for SUD providers on the assessment of women of childbearing age upon admission for Women’s Specialty Services (WSS) 2. Continue to facilitate the Women’s Recovery Conference annually 3. Support training and education about the impact of SUD on women and their children
Activities	Execute contracts with a variety of providers within the region to ensure enough capacity and methodologies are available to individuals seeking SUD Treatment services who have dependent children
Outputs	Enhance the competency and capacity of WSS service providers at all levels of care, offering different evidenced based practice options to individuals seeking treatment
Intermediate Outcomes	Women with SUD who have dependent children receive appropriate WSS, including information on resources and supports for long term recovery
Long term outcomes	Decrease the number of NAS births in the region
Location	<ol style="list-style-type: none"> 1. Genesee County 2. Lapeer County 3. Sanilac County 4. St. Clair County

Table X. The PIHP’s Established Providers EBPs
